

Positive Parenting Tips for Healthy Child Development

Infants (0-1 year old)

Developmental Milestones

Cognitive development for your baby means the learning process of memory, language, thinking and reasoning. Your baby is learning to recognize the sound of your voice. She is also learning to focus her vision from the periphery or the corner of her eyes to the center. Language development is more than uttering sounds (“babble”), or mama/dada. Listening, understanding, and knowing the names of people and things are all components of language development. During this stage, your baby is also developing bonds of love and trust with you. The way you cuddle, hold, and play with your baby will set the basis for how he will interact with you and others.

For more information on developmental milestones and warning signs of possible developmental delays, visit [Learn the Signs. Act Early.](http://www.cdc.gov/ncbddd/autism/ActEarly) (<http://www.cdc.gov/ncbddd/autism/ActEarly>)

Positive Parenting

- Talk to your baby. It is soothing to hear your voice.
- When your baby makes sounds, answer him by repeating and adding words. This will help him learn to use language.
- Read to your baby. This helps her develop and understand language and sounds.
- Sing to your baby.
- Play music. This helps your baby develop a love for music and math.
- Praise your baby and give him lots of loving attention.
- Spend time cuddling and holding your baby. This helps her feel cared for and secure.
- The best time to play with your baby is when he’s alert and relaxed. Watch your baby closely for signs of being tired or fussy so that you can take a break.
- Parenting can be hard work! Take care of yourself physically, mentally, and emotionally. It is easier to enjoy your new baby and be a positive, loving parent when you are feeling good yourself.

Promoting the health of babies, children, and adults,
and enhancing the potential for full, productive living
